

Lünecom starts with ocilion's IPTV solution

- Modern IPTV offer for Northern Germany and the North Frisian Islands
- Turnkey cloud solution for a quick start of your own Lünecom TV product "LCTV"

Ried im Innkreis, Austria - June 10th, 2021 - Lünecom Kommunikationslösungen GmbH relies on the cloud solution from ocilion to deliver a comprehensive and future-proof IPTV product to its customers. The northern German provider has been supplying the regions around Lüneburg, Uelzen, Lüchow-Dannenberg, Gifhorn and the North Frisian Islands with broadband networks and individual solutions for commercial, municipal and private requirements since 1995. As a pioneer, Lünecom has relied on fiber optic technology since 1998 and has invested heavily in network expansion and the digitization of rural areas. The products and services include Internet tariffs, IP telephony, telephone systems, cloud services, the online shop and, from now on, IPTV.

With the cloud solution from ocilion, Lünecom is now delivering a comprehensive TV product under its own brand "LCTV". This includes an individual user interface, time-shifted television, 4K set top boxes, a mobile app, channel packages and numerous other convenience functions.

Lars Grodtmann, "LCTV" project manager at Lünecom: "We are delighted to be able to offer our customers a TV product that - in addition to the large variety of channels and high picture quality - offers these many additional and very useful functions. The trend towards non-linear television will continue to gain momentum. As a strongly customer-oriented company, we can now adequately meet this demand on our high-performance networks."

Hans Kühberger, Managing Director ocilion: "With Lünecom, a real pioneer for fiber optic technologies relies on our cloud solution, which not only supplies the mainland but also the North Frisian Islands with broadband. With the existing infrastructure, your own IPTV product is predestined and strengthens the broad product portfolio, while the further expansion of fiber optics is pushed forward."

About Ocilion IPTV Technologies GmbH

The IPTV specialist ocilion is developing tailor-made complete IPTV solutions since 2004 for service providers and network operators as well as for the in-house sector - from hotels to hospitals to stadiums. As leading B2B provider in German-speaking countries, ocilion provides more than 80 network operators and has realised more than 150 in-house installations. Service providers have the choice between a local installation (on-premises) and a comprehensive cloud service (hosted by ocilion) as a rental option - optimized for small and medium-sized network operators.
