

# Set Top Box P470 Hybrid

## ocilion P400 Produktlinie

The P470 is a compact all-rounder with integrated 8-fold DVB-C for IP- and DVB-C environments. As part of this product line, the P470 was honored with the **Red Dot Award: Product Design 2020** honored. Due to the puristic design, it fits into different environments.

## Hardware & Interfaces

In addition to 4K / HDR, the P470 supports the latest technologies and is equipped with a DVB-C tuner. This takes over the processing of the DVBC signals for a wide variety of purposes: In addition to the local recordings, the tuner processes several signals in parallel so that stations are available in the shortest possible time. This results in extremely short switching times. With the integrated app platform based on HTML5, apps and external content can be accessed directly from the box. The P470 is available with infrared or Bluetooth remote control operable - via Bluetooth even without visual contact. The integrated WLAN receiver enables wireless operation. The P470 does not need a fan and therefore runs silently.
