

# Remote Control T4H Notus

## Control for set top boxes and TV sets

The ocilion Notus remote control combines well thought-out functionality with design. The function key assignment (info, search, back, TV) and the home key, as well as their printing, are tailored to the functions of the IPTV platform. With bluetooth, devices can also be controlled without direct line of sight, and updates to the remote control software can be made.

### Branding options

### Integrated TV database

### Bluetooth Low Energy

Haptics & quality: The housing of the T4H is made of ABS plastic. The bottom, like the basic keyboard, is rubberized. The cursor and OK buttons are accented with a high-gloss finish. All buttons are PU-coated for a long service life. The remote control is also available with a white top (bottom in black).

## Your brand in hand

You can have the T4H branded with your logo and the home button can also be individually printed.
